

The background of the slide is a solid light purple color. Overlaid on this is a series of concentric, rounded square outlines. The outermost square is a light purple, and as the squares move inward, they become progressively darker, transitioning through shades of purple to a very dark purple or black at the center. The squares are slightly offset from each other, creating a sense of depth and movement. In the center of these squares is a large, irregular black shape that resembles a blob or a splash. A white rectangular box is positioned in the upper-middle part of the image, containing the title and subtitle text.

100 random blobs

November the 16th, 2015 — Vasilis van Gemert

Every day my webserver generates a new book, filled with blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
